

Designing a Sales Dashboard in Excel

Problem Statement

Use Excel to analyze the sales based on various product categories.

Description:

The dataset in file **E-Commerce Dashboard dataset.xlsx** contains sales data for different product categories. The following are the features in the dataset:

Order ID	Unique Order ID of a product
Order Date	Order Placement Date
Ship Date	Shipment Date of the placed order
Aging	Used to Create Histogram Bin
Ship Mode	Shipment mode of placed order
Product Category	Product Category
Product	Name of the Product
Sales	Sales Amount
Quantity	The amount or number of a material
Discount	A deduction from the usual cost of something
Profit	A financial advantage or benefit
Shipping Cost	The amount required to ship the placed order
Order Priority	Precedence of placed order
Customer ID	Unique Customer ID
Customer Name	Name of the Customer
City	Unique City Name
State	Unique State Name
Country	Unique Country Name

Region Especially the part of a country

Months The month of placing the order

The following project tasks are required to be performed in Excel:

- Use the saved Sample E-Commerce database
- Prepare a table of Sales and Profit month-wise in a working sheet
- Prepare the sales table region-wise in the working sheet
- Create User Control Combo box for Product Category
- Create a Column Chart of the month-wise table and region-wise table
- Link the table with a combo box
- Create a dashboard

Tools required: Microsoft Excel, Data Analysis Add-in

Expected Deliverables: Design a sales dashboard that analyzes the sales based on various product categories. The company wants to add user control for product category so that users can select a category and can see the trend month-wise and product-wise accordingly.

Solution:-

Description

I applied many Excel principle I knew, from data preparation to visualization, to this project. I concentrated on using an interactive Excel dashboard to examine the financial performance of an online retailer. I examined the sales based on different product categories using Excel.

Objective

An Online E-Commerce Company wants to design a Sales dashboard to analyze the sales based on various product categories. The company wants to add user control for product category, so users can select a category and can see the trend month-wise and product-wise accordingly.

- Prepared a table of Sales and Profit month-wise in one sheet, named it as 'Working'. Table is linked with comb box and

Code Used :

Sales =SUMIFS(saletbl[Sales],saletbl[Months],[@Months],saletbl[Product Category],\$J\$3)

Profit =SUMIFS(saletbl[Profit],saletbl[Months],[@Months],saletbl[Product Category],\$J\$3).

- Prepared the sales table region-wise in the working sheet.

Code Used :

Sales =SUMIFS(saletbl[Sales],saletbl[Region],[@Region],saletbl[Product Category],\$J\$3) and later linked with combo box.

- Created a Column Chart of a month-wise table and region-wise table
- Created a dashboard. Created as per requirements meticulously designed and it matches with the sample output.
